

> Sand Spreader Bucket SPH 20-30 / wheel loader

03-06

This sand spreader bucket grows to fit the job. Screw-on extension plates increase its volume by a full cubic meter.

The spreading roller is powered by a hydraulic motor with a built-in flow regulator. Spreading volume is controlled by changing the oil flow to the hydraulic motor

**Standard features:**

- > Width limiter for sanding walkways, etc.
- > Mixer grinds frozen chunks and prevents compaction.

Mount: Large BM.

**Technical data:**

**SPH 20-30**

Working width/mm	2510
Spreading width/mm	2240
Height/mm	1145
Depth/mm	1450
Volume/m <sup>3</sup>	2.0 / 3.0
Max. hydraulic flow, liter/min.	180
Max. pressure/bar	210
Regulated flow, liter/min.	0-95
Weight/kg/with extension frame	790/850
