Multi-position vee plow VP1400-2400

The small VP 1400 V-plow is a lightweight design intended for property managers using small vehicles.

V-plows VP 1500-2400 are snowplows well suited to vehicles ranging from small to large tractors and wheel loaders.

A spring-loaded guard of wear steel and a tip lift reduce the risk of collision damage. Lateral mobility is a standard feature to ensure maximum road contact.

The entire range is based on sturdy, robust designs.

Accessories:

- > 6/2 selector valve including cable and control grip with or without throttle.
- > Support skid with crank-adjustable height.
- > Support wheel with crank-adjustable height.
- > Rubber or polyurethane 30 mm cutting edge.
- > Diagonal valve enables simultaneous control of both plow wings.

Mount:

A large selection of mounting attachments enables the plows to be adapted for use with most available equipment types.
